ANNUAIRE PLUVIOMETRIQUE DE TUNISIE

ANNEE
1975-76

INTRODUCTION

Généralités :

La présente publication contient toutes les observations pluviométriques journalières mensuelles et annuelles faites dans 450 stations pluviométriques de la Tunisie durant l'année hydrologique 1975-76 qui s'étend du 1er septembre 1975 au 31 Aout 1976.

La répartition des postes dans le présent annuaire suit la division hydrométrique du Pays en sept grands bassins portant des numéros de codification de 3 à 9.

- La bassin "3" : couvre le Nord de la Tunisie et la région des lacs Ioakoul et Bizerte.
- Le Bassin "4" : Comprend le bassin versant de Miliane et Cap-Bon.
- Le Bassin "5" : Correspond au bassin de la Medjerda.
- Le Bassin "6" : Couvre tout le centre de la Tunisie (Zeroud, Merguellil, Nébhana).
- Le Bassin "7" : Comprend le sahel de soussa et de Sfax.
- Le Bassin "8" : Couvre le sud du Pays jusqu'au Nord du Chott Djerid.
- Le Bassin "9" : Couvre l'extrême Sud jusqu'aux frontières Algériennes et Libyennes.

A l'intérieur de chaque bassin, les postes pluviométriques sont classés par ordre alphabétique et portent des numéros de codification mécano-graphique de cinq chiffres dont le premier correspond au numéro du bassin auquel il appartient.

Une liste complète des postes pluviométriques figurant dans cette publication est donnée à la suite de cette introduction.

Présentation des relevés pluviométriques :

La première partie de la présente publication est une analyse sommaire de la pluie en Tunisie durant l'année agricole 1975-1976. (à effet 90 station ont été choisie 5 par Gouvernorat) pour caractériser la situation pluviométrique au cours de cette année.

La deuxième partie comprend les relevés pluviométriques journaliers. Ces relevés se présentent sous forme de tableaux annuels et sont groupés par bassin et suivant le même ordre que dans la nomenclature.

Au bas de chaque tableau nous donnons les totaux mensuels et la hauteur annuelle si les observations sont complètes pour toute l'année.

Nous donnons aussi, pour chaque mois, les commentaires codés, le nombre de jours de pluies, le nombre de jours de pluies supérieure à 1 mm, 10 mm et 30 mm.

Dans la dernière partie du présent annuaire nous donnons les cartes d'isohyètes mensuelles, saisonnières et annuelles.

Commentaires :

Notre souci majeur étant de rassembler le maximum de relevé pluviométriques dans ce recueil, nous avons été amenés à publier, en plus des données des postes pluviométriques complets, les tableaux de certains pour lesquels on dispose d'au moins 75% du total annuel. Pour chacun de ces dernières la pluviométrie du mois est alors estimée à partir des postes voisins. Une première critique se fait automatiquement à la réception du bulletin pluviométrique. Elle consiste à comparer les relevés des postes voisins et éliminer toute observation qui nous semble aberrante. Cependant les valeurs qui nous semblent acceptables sont reproduites fidèlement telles qu'elles sont sur le bulletin d'observation. Aussi quelques pluviométries journalières sont décalées d'une journée. Les observateurs ont en effet reçu la consigne de faire leurs observations quotidiennes à 8 h du matin et de marquer les quantités mesurées à la date de la veille mais malheureusement cette consigne n'a pas toujours été respectée. C'est seulement au stade de la préparation de ces données pour la sortie l'ordinateur que se font les commentaires qui paraissent en bas du tableau. Ces commentaires concernent l'origine, la valeur et la qualité des relevés.

A propos de l'origine nous indiquons si les relevés proviennent directement du bulletin original ou s'ils sont recopiés. Dans le commentaire sur la valeur nous indiquons si les relevés sont complets pour tout le mois incomplet ou s'ils sont groupés.

Enfin en ce qui concerne la qualité nous indiquons si ces relevés ont été contrôlés ou reconstitués.

Conclusion :

Ce recueil reproduit le plus fidèlement possible le contenu des bulletins des observations que nos observateurs nous envoient régulièrement. Nous prions MM. les observateurs de trouver ici notre grande reconnaissance d'avoir bien voulu accepter de s'occuper avec dévouement de nos postes pluviométriques et de nous transmettre régulièrement les résultats de leurs observations.

Nous prions enfin MM. Les observateurs et les services publics qui disposent chez eux de bulletins d'observations pluviométriques soit de l'année en cours soit des années précédentes de bien vouloir les adresser à nos services afin de satisfaire toutes les demandes de renseignements.
